both the historical and contemporary cases, it is useful to briefly review how technologically mediated connectivity has been more broadly described and envisioned Technologies have always influenced how people experience time and space (for historical accounts see Kern (1983) of Standage (1998)) One of the most powerful and persuasive ideas

EXCAVATING THE PREHISTORY OF TIME-SPACE COMPRESSION

time-space compression is a means of viewing spatiality as a quilt of sociospatial practices that are folded and refolded, like origami Relational space has been particularly useful in comprehending the time-space compression of globaliza-tion (Sheppard 2002), in which wormholes distort time and space as changing
